Parker and big sister
Payton

Parker making a funny
face.

We would like to introduce you to a very courageous little boy named Parker Underwood. He is a two year old boy who was diagnosed with M5 Acute Myelogenous Leukemia (AML) February 12, 2007. He is the son of Jamie and Aaron, who along with his sisters Payton (5yrs) and Paige (3 mths), are on this journey with him to become cancer free.

Parker is receiving treatments in Orlando at the Arnold Palmer Hospital while the family is residing at the Ronald McDonald House. Parker was close to receiving a bone marrow transplant, but the leukemia reappeared so he is undergoing more chemotherapy.

This has been a very challenging battle for the family who just moved from Fort Myers to Deland late last year. Parker doesn't fight this battle alone. On this adventure he is prayerfully accompanied by many who know him and his family and many who, though they don't know him personally, are related by faith.

Showcase will donate all ticket sales from its Sunday, October 21st show to the family. Help us help Parker and his family.
